A New Zealand international meat and food marketing company

<b>New Zealand Ovine Meat and Bone Meal</b> <b>Product Information Sheet</b>	
<b>Product Description:</b>	Produced from an homogenous consistent mixture of fresh by-products in natural occurring proportion; collected in slaughtering facility under veterinary supervision. The lambs are grass fed 'Free Range', and in accord with New Zealand governmental policy the lambs are free from hormones and growth promoters. This is a natural product with slight variation throughout the season. This is considered as typical.
<b>GMO Statement:</b>	The Ovine meal, supplied to EEC customers, is derived from grass fed Ovine species and since the GMO is directly related to cereals, by definition since the Sheep / Lambs eat only grass and no cereal, the Ovine MBM can be said to be free of GMO.
